

# Train the Trainers: In-Person Hands-On Training

Teach the next  
generation  
of drone  
pilots!

## SET YOUR DRONE CLASS UP TO HIT THE GROUND RUNNING

Excel as a drone instructor by learning in-person from a DARTdrones Instructor. With thousands of hours of classroom drone instruction experience, DARTdrones instructors are the best of the best, manned aviation pilots who teach teams at the nation's largest drone programs and fly drones in the field every day.

### YOU WILL GAIN:

#### Trusted Partners

Ask questions of our instructor, get one-on-one advice, and build a network of ongoing support. Learn alongside other teachers and build a relationship so that you can lean on each other while teaching the course.

#### Part 107 Knowledge

Before teaching your class, prepare for the FAA Part 107 Certification the most effective way: with in-person training. Build extensive foundational knowledge of the most complex test topics.

#### Confidence

Our instructors won't just teach the course to you. They teach you to teach the course. Fly with our instructor until you feel confident to practice on your own. Make starting a drone class a seamless process.

"The DARTdrones Train the Trainer training was a phenomenal week of preparation for our Texans Can Academy trainers. We left feeling confident and well equipped to train our students for their Part 107 test."

- Ken Reynolds, Project Director

### STANDARD TRAINING:

- 3 - 5 Days of In-Person Structured Training
- Our Instructor Comes To You
- 8 - 10 Teachers Per DARTdrones Instructor
- We Encourage Schools to Bring in Other Schools and Districts
